ABOUT ME

I am a filmmaker based in Berlin with over 10 years of experience in film and television production across Mexico and Germany. Holding a Master's degree in Cinematography from MetFilm School Berlin (University of West London), I have worked across production, camera and post-production. I currently focus on video editing, color grading and AI-assisted post-production workflows in DaVinci Resolve. My experience across production, camera and post-production allows me to bridge creative vision with technical execution. I am interested in joining creative teams in video editing, post-production, color grading or cinematography, contributing my production experience and visual storytelling background while continuing to grow in AI-assisted filmmaking workflows.

SELECTED FILMOGRAPHY

Cinematographer

She Remains | Documentary | 2026 (*In Production*)
Head of Camera Department • Editor • Colorist

Summers in January | Short Film | 2024
Director of Photography (Post-production)
